OBJECTIVE

A dedicated and passionate computer science student excelling in robotics, artificial intelligence, graphic designing, and app development, with a strong focus on machine learning. Experienced in co-founding tech platforms, developing software, and managing organizational operations. Proven academic excellence, leadership skills through international volunteering, and deep interest in building intelligent systems and robotic platforms.

EDUCATION

BRAC University

Dhaka, Bangladesh

Bachelor of Science in Computer Science and Engineering

2022 – Present

– **CGPA:** 3.76 / 4.00 (Credits completed: 124)

– **Relevant Coursework:** Artificial Intelligence, Machine Learning, Data Structures and Algorithms, Operating Systems, Embedded Systems, Computer Vision, Software Engineering

– **Undergraduate Thesis:** ADECS: An Agentic AI Framework for Anomaly Detection and Intelligent Decision Support in Elderly Care System (Grade: A+, Marks: 98.875/100)

Motijheel Ideal School and College

Dhaka, Bangladesh

Higher Secondary Certificate (Science)

2019 – 2021

– **GPA:** 5.00 / 5.00

Ideal School and College (Mugda Branch)

Dhaka, Bangladesh

Secondary School Certificate (Science)

2018 – 2019

– **GPA:** 4.94 / 5.00

WORK EXPERIENCE

Co-Founder & Chief Operating Officer (COO)

Jan 2025 – Present

Onnesok (Full-time)

Bangladesh

– Co-founded an innovation-driven tech startup focused on digital products and game development.

– Leading strategic planning and operational execution to scale creative ideas into impactful solutions.

Graphic Designer

Jan 2024 – Dec 2025

Intellectium (Contract)

Bangladesh

– Designed creative visual content for digital platforms, branding, and marketing campaigns.

– Collaborated with teams to deliver high-quality, engaging design solutions aligned with client needs.

Facilitator

Sep 2024 – Jun 2025

Ecollab International

International

– Conducted training sessions and workshops on leadership, communication, and collaboration.

– Mentored participants and supported program activities to ensure effective learning outcomes.

Coordinator

Jan 2025 – Feb 2026

BuReD (BRAC University Research and Development Club)

Dhaka, Bangladesh

– Coordinated club activities, workshops, and seminars aimed at promoting academic research and development.

– Facilitated student research initiatives, collaborating with teams and faculty mentors to support project execution.

Team Lead – Social Media & Content

May 2024 – Jun 2025

Project Proyash (contract)

Dhaka, Bangladesh

– Led the social media and content team, developing strategies to enhance online presence.

PROJECTS

Mobile & Web Applications | Flutter, Firebase

– Developed cross-platform mobile and web applications including **Learners** and **HireEasy** using Flutter.

– Integrated real-time databases, authentication, and cloud services using Firebase for seamless user experiences.

Game Development | *Godot, UI/UX*

- Designed and developed multiple interactive games including **ShooterX**, **Sky Ball**, and **Adventure of Sui** using the Godot engine and Flutter.
- Focused on fluid game physics, intuitive user interfaces, and immersive gameplay experiences.

AI-Powered Bionic Arm with Sensory Feedback | *Python, ML, Embedded Systems*

- Designed and implemented an AI-powered bionic prosthetic arm featuring real-time sensory feedback mechanisms.
- Integrated machine learning algorithms with embedded control systems for adaptive and intuitive grasp patterns.

Quadruped Robot (AI-Based Robotic Dog) | *Python, Reinforcement Learning, MuJoCo*

- Developed a four-legged robotic dog simulation using MuJoCo physics engine for stable terrain locomotion.
- Implemented reinforcement learning algorithms to optimize walking, balancing, and obstacle avoidance policies.

Reinforcement Learning Simulations | *Python, Q-Learning, OpenAI Gym*

- Built and trained reinforcement learning agents across various custom and benchmark environments using OpenAI Gym.
- Implemented Q-Learning and deep reinforcement learning algorithms to solve complex decision-making tasks.

Face Detection System | *Python, OpenCV*

- Developed a real-time face detection and tracking application utilizing OpenCV libraries and computer vision techniques.
- Optimized detection pipelines for low-latency processing and accurate multi-face tracking under varying lighting conditions.

TECHNICAL SKILLS

Programming Languages: Python, Dart, C, C++, JavaScript, HTML/CSS

AI, ML & Computer Vision: Machine Learning, OpenCV, OpenAI Gym, Reinforcement Learning, MuJoCo

Mobile & Game Development: Flutter, Android App Development, Godot, Blender, Graphics Design

Robotics & Systems: ROS, Robotics, Arduino, Embedded Systems

Tools & Databases: Firebase, Git, GitHub

HONORS & ACHIEVEMENTS

- **VC Special Recognition Award** — BRAC University, Fall 2025.
- **Merit-Based Scholarship** — BRAC University, awarded for academic excellence.
- **Gold Award** — IEEE R10 Humanitarian Technology Challenge (HTC) for Bionic Arm with Sensory Feedback, Oct 2024.
- **2nd Runner-Up** — IoTrix: National-Level IoT & Embedded Systems Hackathon, Nov 2025.
- **2nd Runner-Up** — bdapps Innovation Summit (Project: ShooterX), Aug 2025.
- **1st Runner-Up** — Poster Presentation (GenesisX) at BRAC University Research for Development (BuReD), Dec 2024.
- **Honourable Mention** — International Science and Invention Fair (ISIF Bangladesh), Oct 2025.
- **Winner (Grant Award: 55,000 BDT)** — University Innovation Hub Program, Mar 2025.
- **Best Campus Ambassador** — Intellectium (International Organization affiliated with the United Nations), Mar 2024.
- **Qualified** — International Astronomy and Astrophysics Competition (IAAC), 2021.
